

Get tested for chlamydia, free of charge

1 Order a test

Scan the QR code on the right.

You can also log on to 1177.se. Scroll down to “Customised sample management” and click on “Order tests and results”. Enter an address. You can have the test sent an address other than your registered address. Within a few days, the test will be delivered in an unmarked envelope to the address you provided.

2 Take the test

The test is easy to take. It consists of either a urine sample from the penis or a swab sample from the vagina. You collect the sample yourself in private, following the instructions provided.

3 Return the sample

Put the sample in the reply envelope you received with the chlamydia test and post it. No stamp is needed.

4 Test results

After about a week, you will receive the results of your test when you log on to 1177.se. If you have entered your mobile phone number or e-mail address under “My settings”, you will receive a text message or e-mail when your test results have been received.

5 If you have chlamydia

If the test shows that you have chlamydia, information about where to go for treatment will be included with your test results. Chlamydia can always be cured and treated with antibiotics. Treatment is free of charge.
